Our Observations

"It seems that either you have just started your preparation or have not read sufficient number of books. It is also possible that you have not read the books properly, the way they should have been read. Your basics need a lot of improvement. It is also a possibility that you have read the books just to cover them, but UPSC preparation requires a deeper study - understanding the concepts well. Practicing a lot of questions related to a topic and doing a lot of test papers will help you choose appropriate books and it will also teach you how to read them. You must consult your peers and teachers to build a right strategy about your study."
